

Visual Design Exercise - Netflix Community

Background

Netflix is exploring ways to make watching movies and TV shows a more social experience.

The goal is not to build a traditional social network. Instead, we want to help viewers discover great content, engage with other fans, and build communities around the movies or series they love.

Imagine Netflix is introducing a dedicated **Community** experience as a new product initiative.

This is a **greenfield design exercise**. You are designing the experience from first principles.

Important: Do NOT use Netflix's existing design system, design language, UI patterns, visual style, branding, colors, typography, components, or layouts. We are **not** evaluating your ability to replicate Netflix. We want to evaluate your ability to create a fresh, premium visual language and product experience from scratch.

Design Challenge

Design a community experience that allows users to:

- Read and participate in discussions
- React to posts and comments
- Share thoughts after watching
- Discover conversations around movies and shows
- Feel connected without distracting from the core viewing experience

The experience should feel modern, premium, intuitive, and scalable for millions of users.

Deliverables

Design **3 to 5 key mobile screens** that best communicate your solution.

Suggested screens include, but are not limited to:

- Community Home

- Show or Movie Community
- Discussion Feed
- Comments and Replies
- Create a Post
- User Profile
- Notifications
- Empty States

You do not need to design every possible screen. Focus on the screens that best communicate your thinking and the overall experience.

Evaluation Criteria

The following are evaluation criteria only. You are NOT expected to create separate deliverables for each item below. We will use these dimensions to evaluate the quality of your solution.

Visual Design

- Visual hierarchy
 - Typography
 - Layout
 - Component design
 - Spacing
 - Attention to detail
 - Overall polish and craft
-

Constraints

- Design for a **mobile-first** experience.
 - **DO NOT use Netflix's existing design system, design language, UI patterns, visual style, branding, colors, typography, or components.**
 - Create your **own visual identity and design system** for the Community experience.
 - Focus only on the Community experience, not the core streaming experience.
 - Design for a global audience.
-

Presentation

You will have **20 to 30 minutes** to present your work.

Please walk us through:

- Your approach
 - Key design decisions
 - Visual design rationale
 - Trade-offs you considered
 - How you balanced engagement with simplicity
-

What We Are Looking For

We are **not** looking for a redesign of Netflix or a recreation of its existing interface.

We want to evaluate your ability to design a **new product experience and visual design from scratch**.

The strongest submissions will demonstrate:

- Exceptional visual design craft
- Strong product thinking
- Clear interaction design
- Systems thinking
- A cohesive visual language
- Attention to detail

Think beyond individual screens. Show us how your design principles come together to create a premium, engaging, and scalable community experience.
